

Features

- * Communication protocol: Application layer adopts AllGo, and the bottom layer adopts Rime.
- * Two-way communication: Many parameters can be set. Support multiple manufacturers of smart hosts.
- * Working frequency band: 315M/433MHz. It can be customized to other frequency bands such as 868MHz.
- * Adjustment method: GSK/FSK
- * Transmitting power: 10dbm
- * Number of channels: 256
- * Receive sensitivity: -110dbm
- * Scene function: You can set up to 32 scenes.
- * Reporting function: Press the button to report to the host.
- * Remote control function: Remote control can directly control the switch.
- * Mutual control function: Any button of the switch can be used as a remote control button, and mutual control can be realized between the switches.
- * Wiring method: Zero fire line.

Specifications

Model	TR-0726
Number of buttons	3
Shell material	High flame retardant PC material
Stand-by current	In the RF receiving state, it is less than 20uA/AC220V, that is, the standby power is 0.005W.
Minimum load	3W
Maximum load	Total power 1500W, single channel 500W
Dimensions	86mm*86mm*33mm
Operating temperature	-30°C~70°C
Working humidity	<90%
Executive standard	IEC 60669-2-1
