AI-Powered Video Analytics Platform

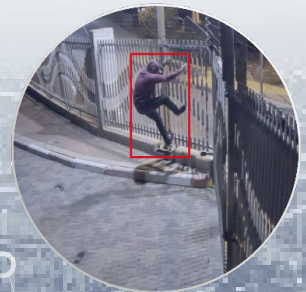

Instantly Transforms Any Camera into a Smart IoT Device

Proactive Security

Shorter Investigation Times

Enhanced Situational Awareness

Improved Operational Insights

AGENT 

Comprehensive AI-Powered Video Analytics

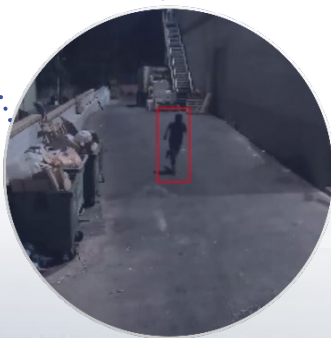

A New Way of Deploying and Managing Video Analytics

innoVi's flexible, robust platform provides a broad set of highly sophisticated AI-powered video analytics capabilities for real-time detection of events of interest, object tracking, and quick extraction of events and data from recorded video.

A Modern "Cloud-Ready" Architecture

Future-Proof, AI-Powered Video Analytics Software Platform

- Transforms any ONVIF / RTSP fixed IP camera into a smart IoT device within seconds
- Designed for large scale and distributed, remote installations
- Available as software as a service (SaaS) or customer hosted installation
- Access from anywhere via web-based browser interface
- Modern software architecture increases scalability, reliability, and maintainability

Installer and End-User Focused

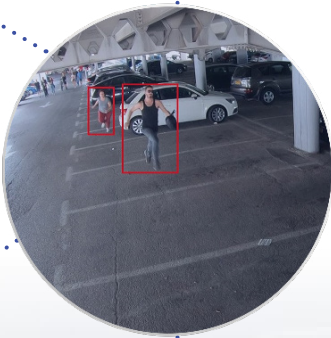

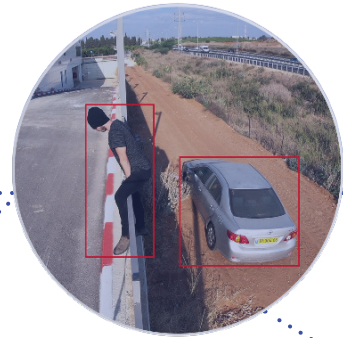

Connect to Any Camera, Anywhere, in Seconds

- Camera and VMS-agnostic
- Complete auto calibration without need for constant tweaking or maintenance
- Customized capabilities available
- Connects to new and existing surveillance networks

Agent Vi's Proprietary Artificial Intelligence Engine

Next-Generation, Feature-Rich Video Analytics

- Custom built 2nd generation Deep Learning algorithm
- Trained on millions of reference images from real surveillance footage (CCD & thermal)
- Precise classification of numerous classes of objects
- Broad set of pre-optimized video analytics functionalities
- Field-proven across thousands of sites
- Industry-leading low-cost H/W per camera ratio

Agent Vi – The Video Analytics Pioneer

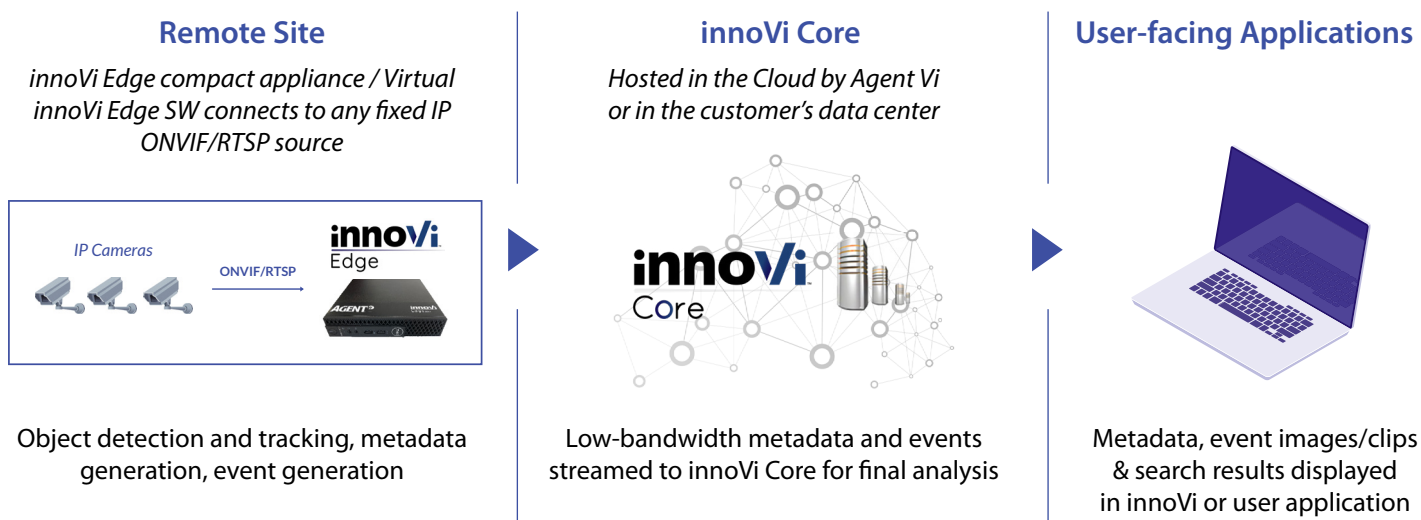

State-Of-The-Art Analysis & Investigative Tools from the Industry Leader

- Founded in 2003
- Boasts proprietary AI-powered algorithms and architecture
- Thousands of deployments worldwide across multiple industries

innoVi – Different Solutions for Different Scenarios

innoVi Capabilities – Summary	innoVi Remote Guarding	innoVi Investigation	innoVi Enterprise	innoVi Corporate
	Intrusion detection & monitoring	Automated video search & analysis	Security & safety for all environments	Comprehensive & customized capabilities

innoVi Architecture

Available as a cloud-based service hosted by Agent Vi, or as an on-premise solution hosted by the customer.

About Agent Video Intelligence

Agent Video Intelligence (Agent Vi™) is the leading global provider of AI-powered open architecture video analytics solutions. Agent Vi's comprehensive offering includes software products for automatic analysis of live or recorded surveillance video, allowing real-time detection of events of interest, object tracking, and quick extraction of events and data from recorded video. Agent Vi's solutions can be deployed on-premise on the customer's infrastructure, or delivered as a cloud-based SaaS, and are fully integrated with a variety of third-party cameras, encoders, video management systems and alarm automation software.
