

uTrust TS Government Reader Family Mullion, Wall Mount, and Keypad

- **FICAM MIGRATION**
 Versatile platform with full range of FIPS 201 approved products
- **ONE READER, ALL MAJOR CREDENTIALS**
 Supports PIV, PIV-I, CIV, CAC, with optional support for legacy proximity
- **CERTIFICATE CHECKING AT THE DOOR**
 Fast, usable, FICAM-compliant card authentication key (CAK) validation
- **FEDERAL COMPLIANCE**
 FICAM certified for CAK validation systems (first approved Ethernet reader); enables compliance with FIPS 201, FIPS 140-2, and NIST SP800-116 publications

Government Solutions

Identiv's uTrust TS Government Reader solution offers an extensive product family that encompasses both single and dual-factor authentication configurations. uTrust TS Readers offer an excellent balance of compliance, interoperability, and security for federal agencies, governmental contractors, and other facilities.

Solid Performance Merges with High Security

The uTrust TS Government Reader is the industry's most flexible and highly secure intelligent door reader endpoint. It enables agencies to deploy a highly secure U.S. government FICAM card authentication key (CAK) at a fraction of the cost of competing solutions. The reader supports and reads any PIV-based card with an ISO14443 contactless interface and a CAK certificate.

The uTrust TS Government Reader Family includes all of the features of uTrust TS Readers with a choice of RS-485 (OSDP) or Wiegand and support for Power over Ethernet (PoE), making it one of the most advanced edge door readers on the market. The reader complies with FIPS 201 and FIPS 140-2, in addition to other international high-security standards

Keypad

For projects that require strong two-factor authentication, Identiv offers the choice between uTrust TS Keypad or uTrust TS ScramblePad Readers.

uTrust TS Keypad offers a weatherproof design with complete key area illumination for evening use and vandal-resistant metal keycaps for extra-long life. The PIN pad supports the most popular data formats to the controller.

uTrust TS ScramblePad combines the uTrust TS Reader's platform performance with a keypad scrambling technique, offering federal agencies a new level of two-factor authentication. Since the TS ScramblePad supports Wiegand, RS-485, and PoE, it's compatible with most legacy controllers.

GOVERNMENT EMPLOYEE AND CONTRACTOR BADGES

VISITOR MANAGEMENT

The uTrust TS Government Reader Family is a perfect solution to support your U.S. government employee badges, as well as visitor management credentials.

WIEGAND

Identiv's uTrust TS Government Reader solutions offer an excellent migration plan for existing Wiegand-based systems. These readers are a direct replacement for existing Wiegand card readers enabling a seamless transition to RS-485 or Ethernet communication for FICAM validation.

VALIDATION ARCHITECTURE | RS-485 (OSDP)

The uTrust TS Government Readers are the industry's most flexible and highly secure intelligent door reader endpoint. They enable agencies to deploy a highly secure U.S. government FICAM card authentication key (CAK) at a fraction of the cost of competitive solutions.

STRUCTURED CABLING

Structured cabling offers an integral power source and simpler maintenance overhead. With network connectivity, centralized reader management eliminates servicing individual readers and provides the ability to evolve installed reader capabilities as needs change and new capabilities are made available.

- Reader Authentication
- PoE
- Advanced Protocols
- Central Updates and Configuration
- Lower Deployment Costs

Identiv, Inc. (NASDAQ: INVE) is the leading global player in physical security and secure identification. Identiv's products, software, systems, and services address the markets for physical and logical access control and a wide range of RFID-enabled applications. Customers in the government, enterprise, consumer, education, healthcare, and transportation sectors rely on Identiv's access and identification solutions. Identiv's mission is to secure the connected physical world: from perimeter to desktop access, and from the world of physical things to the Internet of Everything.

Identiv has offices worldwide. Addresses and phone numbers are listed at identiv.com/contact. For more information, visit identiv.com or email sales@identiv.com.
