COLDSTORE DISK PLAYER
DISKPLAY™ PRO

Networked playback of extracted COLDSTORE disks for evidential purposes.

EASY PLAYBACK

Direct surveillance video playback on your PC from COLDSTORE removable disks

COLDSTORE enables immediate bulk seizure of video surveillance data in portable form for easy playback via DISKPLAY Pro.

| Operates as a low-cost, single-disk, networked read-only COLDSTORE

| Enables review, replay and export of data from an extracted COLDSTORE disk

| Specifically designed for Veracity's award-winning COLDSTORE surveillance storage system

| Disk docking bay accepts COLDSTORE disks in their cradles

| Provides a practical method instant seizure of evidence by removal of disks from COLDSTORE

| Supports Veracity's VIEWPOINT review client software or any fully-integrated VMS

veracity

TECHNICAL **SPECIFICATION**

DISKPLAY™ PRO

MEDIA	
Hard disk	3.5" SATA drive of any capacity
Cradle	COLDSTORE type

POWER	
Unit power	25 W (with removable disk inserted and running)
Power supply	110/240V AC 50/60Hz

SYSTEM	
Operating System	Linux
Software	Single-disk read-only COLDSTORE software system
Network Interface	Gigabit Ethernet

PHYSICAL/ ENVIRONMENTAL	
Dimensions	L 340mm W 220mm H 135mm [L 13.4" W 8.7" H 5.3"]
Weight	3.1Kg [6.83lbs]
Operating temperature	0°C to 50°C [32°F to 122°F]
Relative humidity	Up to 85%, non-condensing
Compliance	FCC, CE, RoHS

PRODUCT CODES	
CSTORE-DP-PRO-UK	DISKPLAY Pro networked docking station for CS disks (UK power supply)
CSTORE-DP-PRO-EU	DISKPLAY Pro networked docking station for CS disks (EU power supply)
CSTORE-DP-PRO-US	DISKPLAY Pro networked docking station for CS disks (US power supply)

COLDSTORE Disks

Each disk recorded by a COLDSTORE surveillance storage array contains a specific segment of time, with a known start time & date and a known end time and date for a fixed set of camera channels. Thus it is possible to physically locate any specific time span of recorded video in a COLDSTORE system and remove the disk for evidential purposes.

It is therefore ideal for rapid bulk seizure of data and evidential transport.

DISKPLAY Pro Playback System

DISKPLAY is a convenient solution for playback of extracted COLDSTORE disks. It is a network device designed specifically for accepting COLDSTORE disk cradles. This allows extracted disks to be played without having to remove the disk from the standard disk cradle. Thus DISKPLAY exploits the unique removable, playable disk feature of the COLDSTORE system.

VIEWPOINT or VMS Playback

DISKPLAY Pro appears on the network as a single-disk, read-only COLDSTORE. This allows integrated Video Management System client software to simply include DISKPLAY Pro as a one-disk COLDSTORE for seamless playback and export of video data through the existing VMS interface. Alternatively, Veracity's VIEWPOINT review client software can be installed as the review client on a standard Windows PC. VIEWPOINT supports a number of different VMS types.

COLDSTORE is available with 15 x 14TB 3.5" drives offering up to 210TB storage capacity - using only 60W.

Veracity recommends the use of a UPS (Uninterruptible Power Supply) system with all types of storage and recording system installations.
